

## Northern Computer Recycling Depot (NCRD)

NCRD aims to provide meaningful and socially valued work/training opportunities for consumers of mental health services. We receive, repair and clean donated computers and sell them at an affordable cost to individuals and organizations within our community which cannot purchase new ones. NCRD is a supportive and flexible setting in which consumers learn how to perform computer maintenance and repair. We provide a safe environment for consumer/survivors to build skills and confidence.

If you would like more information about how to participate in NCRD, or how to donate or request a computer, you may contact our Technician using the email form in the Contact Us section of this website.

Customers and NISA member who need help with their computers, please visit [James McGarry's website](#) to ask your questions.
